

CASE STUDY – EXPLORATION AND MINE SERVICES DRILLING

MINJAR GOLD – SOUTHERN CROSS

Client:

Minjar Gold (Tianye)

Service:

Surface Drilling – Diamond and Reverse Circulation

Location:

Southern Cross, Western Australia

Project Challenges:

- Limited ramp up time
- Ground conditions (waste dumps)
- Terrain for drill pads
- Controlled drilling/target windows
- Hole variation
- Hole angles

Approach and Equipment Used:

- 1 X Sandvik DE880HC
- 1 X Support truck
- 1 X Auxiliary compressor/booster truck

- 4 X Mine Specified Toyota Landcruiser LV's
- Fuel and water pods
- Containers with critical spares
- Survey equipment

Client Outcomes:

- Zero Lost Time Injuries (LTI's)
- Zero re-drills and all targets hit
- All drilling equipment recovered
- Lowest cost per metre when compared to other contractors on site.
