

# GLENCORE COAL

OAKY CREEK PROJECT, QUEENSLAND

## QUICK FACTS

**Commodity** Metallurgical Coal

**Metres drilled** 40,000 per annum

## SCOPE SUMMARY

Glencore Coal's Oaky Creek operations are located in the Bowen Basin coal fields of Central Queensland, Australia. Oaky Creek comprises an underground longwall mining operations producing 4+ million tonnes of premium coking coal per annum. For over 5 years, Mitchell Services has conducted a variety of surface drilling programs including mine services programs for gas drainage (up to 40" hole diameter), mud rotary, chip and diamond coring. Our drilling operations are supported in the region from our major drilling facility in Dysart.

## CLIENT OUTCOMES

- 5 years of operations on site
- Track record of safety and production
- Large diameter drilling up to 40"
- Mine services holes for underground operations
- Highly complex GOAF holes for seam gas drainage

## SERVICES PERFORMED

- ✓ Diamond coring
- ✓ Mud rotary
- ✓ Mine services (large diameter)
- ✓ Chip

## RIGS

- 1 X Schramm TXD130 drill rig
- 1 X Schramm 685 drill rig
- 2 X Sandvik DE840 drill rig
